

WELCOME TO BORROWBUDDY

PREPARED TO: DR. FARAH MUNA BINTI GHAZALI

WHAT IS BORROWBUDDY?

A SMART WAY TO MANAGE LIBRARY OPERATIONS

BORROWBUDDY helps automate book borrowing, returning, and tracking processes. It reduces manual errors, saves time, and improves the library experience for both students and librarians. With real-time book availability, notifications, and digital records, this system modernizes traditional libraries into efficient, tech-friendly services.

PROBLEM STATEMENT

MANUAL & INEFFICIENT PROCESS

The current system is paper-based and requires manual entries by staff, making it error-prone and time-consuming.

LACK OF REAL- TIME DATA

Book availability and rental status are not updated instantly, causing confusion, double bookings, and poor inventory tracking.

NO REMINDER OR LATE RETURN MONITORING

There's no system to notify users of due dates or track overdue books, leading to high rates of late returns and uncollected fees.

OBJECTIVE

- To identify and specify the functional and non-functional requirements for a digital book rental system that addresses current issues such as inefficiency, manual errors, and lack of real-time tracking in the library book lending process.
- To design a user-centered and web-based system architecture that supports core functionalities including user registration, book inventory management, rental tracking, return processing, and notification features.
- To develop and implement the Book Rental System using appropriate technologies, ensuring secure data handling, real-time operations, and an intuitive interface for both members and administrators.

WATERFALL

1

REQUIREMENT ANALYSIS

We identified key users (Admin, Member) and important features like book search, borrow/return, and login to match library needs.

2

SYSTEM DESIGN

We created wireframes for login, dashboard, and rental pages. The database stores books, users, rentals, and late fees.

3

IMPLEMENTATION

We used HTML/CSS, PHP/Java, Framework and MySQL to build the system. Core logic handles login, rentals, and updates.

4

TESTING

Each part (login, book search) was tested. Then we checked everything together to make sure it all works smoothly.

5

DEPLOYMENT

We deployed the system on a test server to show how it works and get feedback. It simulates real library use.

6

MAINTENANCE

Future updates will fix bugs, improve user experience, and add features like return reminders based on user feedback.

VALUE PROPOSITION

WHO CAN WE SELL TO:

- PRIMARY MARKET: SCHOOL LIBRARIES, PUBLIC SCHOOLS, AND EDUCATIONAL INSTITUTIONS
- SECONDARY MARKET: STUDENTS, TEACHERS, PARENTS (VIA WEB ACCESS), COMMUNITY LIBRARIES

REVENUE MODEL

HOW DO WE MAKE MONEY FROM THE SYSTEM?

–AFFILIATE PARTNERSHIPS

PROMOTE AND LINK TO BOOK SELLERS OR PUBLISHERS FOR PURCHASES.

–SUPPORTER DONATIONS

ALLOW DONATIONS FROM ALUMNI, PARENTS, OR LOCAL SUPPORTERS TO SUPPORT SYSTEM MAINTENANCE.

– PREMIUM FEATURES

OFFER PAID ADD-ONS FOR ADVANCED ANALYTICS, STUDENT PERFORMANCE TRACKING, OR AUTOMATED REMINDER SERVICES.

–SUBSCRIPTION LICENSING

CHARGE INSTITUTIONS A YEARLY SUBSCRIPTION FOR FULL SYSTEM ACCESS AND MAINTENANCE.

MARKETING STRATEGY

Social Media Campaigns

Promote BorrowBuddy through school's official social platforms (Instagram, Facebook, Telegram) using posters, student reviews, and demo videos.

Teacher & Librarian Endorsement

Get support from teachers and librarians to introduce the system during library orientations or English/ICT classes.

Interactive Demos & Posters

Install demo booths or put up QR-code posters in library spaces so students can try BorrowBuddy on their devices.

School Newsletters & Emails

Include BorrowBuddy highlights and success stories in the school's digital newsletters or emails to parents.

Student Ambassadors

Assign student reps to guide others on how to use the system and promote it through peer-to-peer sharing.

USE CASE

The background features a dark blue field with abstract, wavy, light blue lines that create a sense of motion and depth, framing the central text.

DEMONSTRATION

CSC577 SOFTWARE ENGINEERING
Entrepreneurship Mindset & Marketability Rubric

Group Name:	BorrowBuddy Book Rental System
Team Member:	Nurainaa Balqis binti Mohd Adly Hafez Hedayat
	Siti Nuraina binti Mahadi
	Nur Adlina Balqis binti Jaafar
	Jauza Kamilia binti Mohd Fuad

Criteria	Description	Marks	Weightage (%)
1. Problem Identification & Value Proposition	Clearly identifies a real-world problem and demonstrates how the prototype provides a viable solution with value to users/customers	5	20
2. Innovation & Uniqueness	Shows creativity or originality in idea, features, or implementation compared to existing solutions	4	16
3. Market Potential & Target Users	Demonstrates understanding of target market, user needs, and potential customer segments	4	16
4. Prototype Usability & Feasibility	The prototype is functional, user-friendly, and feasible for future development or commercialization	4	16
5. Business Model & Monetization	Outlines a clear business model or monetization plan (ads, subscriptions, freemium, etc.)	3	12
6. Presentation & Pitching Skills	Effectively presents the product idea, problem-solution fit, and market relevance using persuasive communication	3	12
7. Team Collaboration & Entrepreneurial Attitude	Demonstrates proactive, risk-taking, and collaborative mindset throughout the project	2	8
